SUSTAINABILITY

EGANT Fjord packaging is a step forward to an environmentally friendlier way. According to our counting, we aim to reduce plastic by 1,5 times with the new packaging.

Our products come packed with paper headcards featuring QR codes. LED Dimmers are also available in gift boxes for the enhanced customer experience and overall presentation. Headcards and gift boxes are 100% recyclable.

The new EGANT Fjord packaging is much more than just a nice look. It is the entire chain of processes. More conveniently packed products mean “leaner” logistics costs, better transportation and overall reduced energy consumption. We are keen on remaining a part of the environmentally friendly community.

PRODUCT LIST

MATTE BLACK
